

Anthropology Resources For Librarians

By: Joyce L. Ogburn

Abstract

As of 1989, no one had compiled a bibliography of resources of use to librarians who had a role supporting anthropologists in their institutions. The present lengthy bibliography began as a print list of 25 entries in the November 1989 issue of ANSS Currents. Over the years the list grew and it was published on ANSSWeb when the site was created in 1995. The bibliography has now migrated to a pdf version and contains more than 500 entries in 25 categories. It may be updated periodically as new resources are discovered.

Introduction

As of 1989, no one had compiled a bibliography of resources of use to librarians who had a role supporting anthropologists in their institutions. The present lengthy bibliography began as a print list of 25 entries in the November 1989 issue of *ANSS Currents*. Over the years the list grew and it was published on *ANSSWeb* when the site was created in 1995. The bibliography has now migrated to a pdf version and contains more than 500 entries in 25 categories. It may be updated periodically as new resources are discovered.

This bibliography is an imperfect guide; undoubtedly there are gaps and errors to be found. As is the dilemma with many bibliographies created since the early 1990s, links on the Internet have either changed or disappeared entirely. Ironically, the *Anthropology News* articles about open access that were openly available on the web are now in *Anthrosource* and inaccessible to those without a subscription. I added JSTOR links some years ago since many intended users have access to JSTOR. These links have changed to be shorter and stable, and I have updated them all. I have not yet taken on the task to determine whether journals have been added to JSTOR that were previously absent.

The bibliography was and still remains focused on resources that explicitly cover anthropology. In recent years, great growth has occurred in the section on scholarly communication and publishing, reflecting the burgeoning interest in open access and fairly recent controversies related to anthropology publishing by professional associations. It should be no surprise that the number of resources involving digital technology and the Internet have also greatly increased in number. So, too, have intellectual property and indigenous knowledge become growing concerns. Archaeoinformatics is a very broad area and could be difficult to stay current as computer technology permeates the field of archaeology. In using the bibliography for anything related to digital projects and technology, it would be wise to review all categories that are pertinent.

I am open to suggestions, revisions, corrections, new resources, or changes assigned categories. Categories are becoming more difficult to assign as more resources include or address digital topics. Send your ideas, please, and your general comments are always welcome. I can be reached at this email address: jogburnlib@gmail.com.

Many thanks to ACRL/ANSS for hosting the information for nearly twenty years.

Contents:

Introduction

- Kansa, Eric C. New Directions for the Digital Past, 1-26.

Section I: A Web of Archaeological Data: Infrastructure, Services, and Interoperability, 27.

- Richards, Julian, Stuart Jeffrey, Stewart Waller, Fabio Ciravegna, Sam Chapman, and Ziqi Zhang. The Archaeology Data Service and the Archaeotools Project: Faceted Classification and Natural Language Processing, 31-56.
- Kansa, Eric C. and Sarah Whitcher Kansa. Toward a Do-It-Yourself Cyberinfrastructure: Open Data, Incentives, and Reducing Costs and Complexities of Data Sharing, 57-92.

Section II: The Technical and Theoretical Context of Archaeology on the Web, 93-94.

- Dunn, Stuart. Poor Relatives or Favorite Uncles? Cyberinfrastructure and Web 2.0: A Critical Comparison for Archaeological Research, 95-118.
- Boast, Robin and Peter Biehl. Archaeological Knowledge Production and Dissemination in the Digital Age, 119-156.

Section III: Archaeological Data Management and Collaboration, 157-158.

- Rains, Michael. Creating a Virtual Research Environment for Archaeology, 159-170.
- Watrall, Ethan. iAKS: A Web 2.0 Archaeological Knowledge Management System, 171-184.
- Kansa, Sarah Whitcher and Francis Deblauwe. User-Generated Content in Zooarchaeology: Exploring the “Middle Space” of Scholarly Communication, 185-206.

Section IV: Sustainability, Quality, and Access, 207-210.

- Wendrich, Willeke. UCLA Encyclopedia of Egyptology, Archaeological Data, and Web 2.0, 211-232.
- Xia, Jingfeng. Open Access for Archaeological Literature: A Manager’s Perspective, 233-250.
- Eiteljorg, Harrison. What Are Our Critical Data-Preservation Needs?, 251-264.

Conclusion

- Limp, W. Fredrick. Web 2.0 and Beyond, or On the Web, Nobody Knows You’re an Archaeologist, 265-280.
